Some digital monitors have a DFP (digital flat panel) port. Naturally you also need a digital port on your PC to take full advantage of a digital display. However, this digital port on your PC is often of a type other than DFP, namely DVI. You can use this DVI digital to DFP cable to connect a monitor with a DFP connection to the digital DVI port on your PC. This gives you perfect digital display quality in an instant.

Box content:

- DVI Digital video cable to DFP- 1.8 m

System requirements:

- Windows 98SE/2000/ME/XP, MAC OS X

Key features:

- Connect your digital monitor to your PC or notebook via DVI and enjoy high picture quality
- DFP(Digital Flat Panel) Supports only digital signals.
- This is the leading connection standard for digital only connection.
- Most TFT-screens with a digital input have this DVI-D connection
